Technical Datasheet

PURIFOG BIOTECT BASE MIXTURE

Description

PURIFOG BIOTECT BASE is a basic mixture designed to dilute the concentrated disinfectant BIOTECT AV (5%) and to be sprayed exclusively through the UR FOG Fogging Systems.

The fog obtained through the mixing of these 2 components, PURIFOG BIOTECT BASE and BIOTECT AV, disinfects all surfaces with which it comes into contact. This spraying process, not requiring the intervention of specialized operators, guarantees a very high efficiency in compliance with a particularly low operating cost. It is recommended for both domestic and professional use.

Specifications

Appearance: Aerosol package - pH: 7 ± 1.0 - Odour: characteristic - Water solubility: Complete

Contains (Reg. EC 648/2004)

Ethanol, Propan-2-ol

Criteria EC Regulation 1272/2008 (CLP):

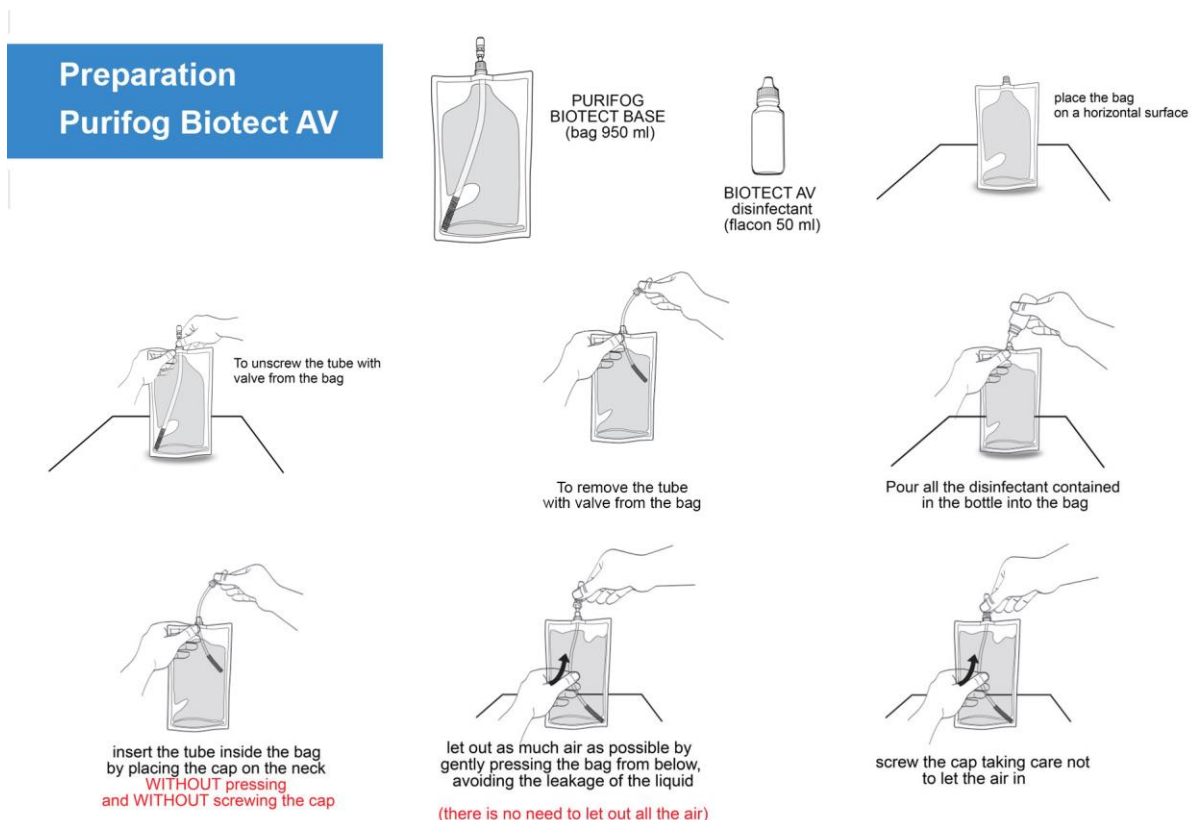

The mixture is classified as not dangerous according to the provisions of directives 1272/2008 EC and 790/2009 EC and subsequent amendments and adjustments

Warnings: Open the package only to dilute the BIOTECT AV disinfectant by following the procedure described below.

Use the PURIFOG BIOTECT BASE product exclusively as a solubilizing solution for the BIOTECT AV concentrated disinfectant product (5%) and only through spraying indoors and in the absence of people and/or animals using only UR FOG/PURIFOG Fogging Systems. Product not to be swallowed.

Instructions for use

- Preparation for use

- Instructions for the use of the Purifog Biotect mixture (Purifog Biotect Base and Biotect AV) with the Fogging System

Launch the UR FOG Fogging System based on the shooting time previously set to spray the PURIFOG BIOTECT mixture.
